《 澳洲陶藝成釉 》

AU Ceramic Solutions Underglazes are available in many brilliant colors and can be used to decorate all types of clay, either on greenware or bisque. The clay once decorated is then covered with a suitable clear glaze and fired to seal the **Underglaze** onto the ceramic ware. Used extensively throughout commercial, school and hobby, **Underglazes** are a common and effective method of attaining solid color finishes over any sized area of clay body. The **Ceramic Solutions Underglazes** have a firing range of between 1100 to 1300° C. The **Underglaze** has been applied and fired correctly when it does not flake, bleed or run under the glaze.

AU Ceramic Solutions One Strokes are available in many bright translucent colours and can be used to decorate all types of clay, either on greenware or bisque. The clay once decorated is then covered with a suitable clear glaze and fired to seal the One Stroke onto the ceramic ware. **One Strokes** are popular for hand painting art works and functional wares on a commercial level or on an individual basis creating brilliant results. **One Strokes** can also be used on top of opaque white glazes giving a textured finish that is commonly known as Majolica. Most of the **Ceramic Solutions One Strokes** have a firing range of between 1100°C - 1300° C. The **One Stroke** has been fired correctly when it does not flake, bleed, run or bubble under the glaze.

《 澳洲陶藝成釉 》

AU Ceramic Solutions Sovereign Colored Glazes are specifically formulated to be applied and fired onto white clays used in the Hobby Ceramics industry. For best results, the Sovereign Colored Glazes must be fired to between witness cone 06-04 (Orton) to produce a glossy and full bodied finish on bisque which has previously been fired to cone 04-03 (Orton). When fired correctly, the Sovereign Colored Glaze will seal and protect the ceramic ware from moisture and discoloration caused by contact with food and liquids for the Sovereign Colored Glaze to be safe when applied to a hobby ceramic body, it must not craze or shiver over the course of time. In the event that either of these defects does occur, the ceramic ware should cease being used as functional ware with food.

《 澳洲陶藝成釉 》

Ceramic Solutions Crystallite Glazes

are lead free and come in a range of decorative matt finishes highlighted by a spattering of tiny glass flecks, giving a slightly textured finish. These products are unsuitable for use on food or beverage containers since the finished product remains unglazed and consequently porous. The Ceramic Solutions Crystallite Glazes have a firing range of between 1060°C to 1300°C. Ceramic Solutions have 17 colors in the Crystallite Glaze range. The following color chart contains the complete range.

Ceramic Solutions Freckle Glazes

come in a range of colored speckle finishes all embedded in a clear glaze and have a firing range of between Cone 06 to 04.

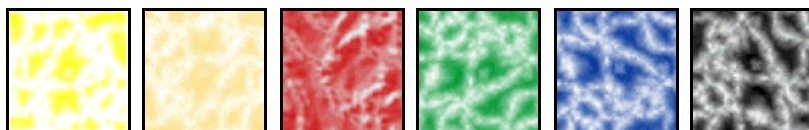

✓ *The speckles are in a clear glaze that may be applied over Underglaze or One Stroke colors to achieve different effects.*
 此斑點釉為透明釉類，可施塗於 Underglaze 或 One Stroke 釉面以獲得特別效果

AU Ceramic Solutions Fired Crackle Color

glazes are lead free and come in a range of decorative finishes creating an aged appearance however in a food safe finish. (1060°C to 1300° C)

The crackle effect is obtained as follows:

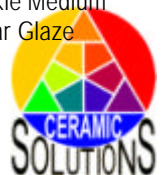

- To bisqueware apply 1 coat Ceramic Solutions *Hobby Clear Glaze or another suitable clear glaze and allow to dry.
- Apply two generous coats of Ceramic Solutions *Fired Crackle Medium allowing each coat to dry.
- Apply a single generous coat of Ceramic Solutions *Fired Crackle Color. Be careful not to double back. Crackle effect will begin immediately until dry.
- Finally apply 2 to 3 coats of Ceramic Solutions Hobby Clear Glaze to completely seal the ware and render it food safe after firing to between cone 06 - 04.

AU Ceramic Solutions Quartz Glazes are available in 3 special effects glazes. The glazes shown are fired on horizontal surfaces to cone 04 – 06, however on vertical surfaces the crystals will have a tendency to run as well. Crystals once formed depending on the size and concentration of crystals will result in glaze crystals ranging in size from 5 mm up to 2 cm in diameter. Items coated with Quartz Glazes are not food safe. (1001°C to 1103° C)

CSSG119-ZT Clear Glaze	GL-001 Hobby Clear Glaze	SATIN GLAZES (1046°C to 1060°C)												
The Clear Sovereign Glaze may be applied over Underglaze and One Stroke decoration to enhance the color and seal the ceramic ware, protect the ceramic ware from moisture and discoloration caused by contact with food and liquids.	Ceramic Solutions Hobby Clear Glaze is a superior low lead "food safe" version especially formulated to provide a high gloss transparent finish without the inherent drawbacks of lead free products and the risks associated with high lead products. The Ceramic Solutions Hobby Clear Glaze needs to be tried to be believed. The results speak for themselves!	Satin Glazes give a smooth, low-sheen finish to ware. Satin Clear Glaze may be used over Underglaze decoration for a muted effect, however it may alter some darker colors. Satin Glazes are for application to bisqueware and when fired correctly will seal and protect the ceramic ware from moisture and discoloration caused by contact with food and liquids.
